Icon design
Hand drawing + Adobe Illustrator

9 iiterations of my symbol design

First, I was just putting my name and the symbol i have choosen together.
there is a lot of detail works in paper cutting
but for the Chiese words, there is no detail in that, just very bond lines and the hard part is to combine them together

I simplify the pattern by using illustrator, turning them into vector.
and for the chinese character, i add some pattern, making them like one part of the paper cutting

this is my last name "ting", a very abstruct word mostly meaning famle, clean, a girly word
